

About the PC Client:

We recommend downloading the latest version of the PC Client.

Once you have downloaded the PC client the window will display:

- Opening **itab Manager V_1_0_1.msi**.
- Click **Save File**.

- The **itab Manager Setup Wizard** window will then appear.
- Click **Next**.

- Save the itab manager to your computer in the **Select Installation Folder** Window. Select a folder by using the Browse option.
- Click **Next**.

- To **Confirm Installation** click **Next**.

- When the installing process is complete click **Finish**.

Please Note:

If you are having problems installing the PC Client you may be required to update your computer by downloading the Microsoft.net framework 3.5.

Find this on the Microsoft website:

<http://www.microsoft.com/downloads/details.aspx?FamilyId=333325fd-ae52-4e35-b531-508d977d32a6&displaylang=en>

To Sync tabs to your device:

(Once you have purchased tabs from our database.)

Open the itab Manager and **connect the i-tab** to your computer.

Enter your **username** and **password**.

E.g Username: Paddy321

Password: itab2010

Select **Sync Now** and wait until synchronization is complete.
